Mexico Oil

This oil stock is selling on the N. Y. Curb at a price that appears to be entirely out of line with its intrinsic value and future possibility.

Provisions reflected the weakness of hog values, but later went up again as a result of shorts covering.

THE BRITISH COMMISION reappeared in the cash wheat market yesterday and bought about \$40,000 bushels of Gulf wheat. That buying came early in the market session and was responsible for the rise in the futures. Late in the day Germany was reported to have purchased, bringing the total amount sold to foreign interests to between 1,000,000 and 1,250,000 bushels. Reports that considerable rye was worked from stocks were taken as high as 600,000 bushels were cut down to about 100,000 bushels could be confirmed here and one house declared that the rye business had been confused with the wheat. Consequently it is probable that 800,000 bushels was an exaggeration and that 100,000 bushels was nearer the correct total. Approximately 40,000 bushels of corn was sold and about 20,000 bushels of barley. Local flour manufacturers were dull, with spot here large and continued offers to sell at concession hinder mill business. There were several inquiries for flour for export, but as there could not be agreed to, none was worked.

NEW YORK PRICES.
